WATER RESISTANT SHADE NETTING

Brought to you by

DriZ the revolutionary ALL WEATHER shade net provides the ultimate in all-weather protection against the harsh elements of sun, rain, hail, snow and wind.

DriZ is available in a variety of attractive colours and this stylish and practical fabric will enhance the appearance of your outdoor surroundings, whilst transforming and protecting your valuable assets.

After 10 years of extensive research and testing, DriZ was developed as a result of on-going commitment to our Research and Development policy. DriZ has grown in popularity since its launch in 2000 and has a niche market in fixed-awning, carport and shade sail structures.

PROUDLY MANUFACTURED IN SOUTH AFRICA

Since 1964

Rust Gold

Silver

Terracotta

TECHNICAL FEATURES

- DriZ water resistant shade netting comes with a laminated UV protective coating, which must be installed with the coating facing downward or away from the sun's direct and damaging UV radiation wavelengths. This coating has limited abrasion and tear resistant properties. Care must be taken to protect the coating against abrasion, snagging or tearing during transportation, makeup and installation of covers.
- The base fabric of DriZ is knitted using a special polyethylene material, more commonly known to the lay person as plastic. As DriZ is a knitted plastic product it will, when exposed to heat, have a tendency to shrink nominally. Covers must therefore be correctly sized and not left unprotected in the sun or high heat areas before being installed.
- NOTE: Depending on the size and condition of the structure, it will have to be signed off by an engineer.

Manufactured by: 

Available in:
- 33m rolls and cut lengths
- Standard width: 3m

DriZ Standard Range	SHADE FACTOR %	UV BLOCK OUT %
Charcoal	97	94
